- Ardiuno R3
- ESP32

PROJECTS

1. **Web Portfolio** [Open](#)

- A personal showcase of my skills, projects, and experiences in IT, web development
- Designed with a clean UI to reflect my creativity, technical knowledge, and passion

2. **Ai Powered Multilingual Chatbot**

- An intelligent chatbot that supports Tamil and English
- Helps farmers with crop advice, pest control, soil testing, and government schemes
- Works with voice/text, supports translation, and gives personalized answers using AI

3. **Engineering Notes Bot** [Open](#)

- Developed a Telegram bot to provide Anna University students with instant access to academic notes and study materials.
- Implemented backend logic for subject-wise content organization, user request handling, and automated file delivery.
- Streamlined resource distribution through chat-based automation, reducing manual effort and improving accessibility.

4. **JDTShirts -Frontend** **E-Commerce Website** [Open](#)

- Built a responsive frontend catalog website for a custom T-shirt brand, showcasing products with images, categories, and size options in a clean shopping-style layout.
- Integrated a WhatsApp ordering feature, enabling customers to place orders directly through pre-filled messages for fast, low-cost communication without a backend.
